AWS Certified Solutions Architect -
Associate (SAA-CO3)

Md. Asraful Haque Sohel

Builder at Peek8.io | AWS Certified Solutions Architect | Helping
Startups Scale Without Infra Chaos | Kubernetes | CI/CD | Monitoring
& observability | Automate infrastructure | Open to Remote/Global
Roles

Dhaka, Bangladesh

Summary

I'm a seasoned IT professional with 18+ years of experience spanning DevOps, Java development, web development and Golang expertise, bringing a unique blend of skills to deliver innovative and scalable solutions.

Today, I run Peek8, an engineering-driven company focused on solving real operational problems with a blend of consulting + open-source tools.

Over the years, I've built and delivered solutions across Kubernetes, cloud platforms, observability, security, and performance engineering — helping teams ship faster, operate more reliably, and reduce cloud costs.

At Peek8, We are building:

- > Bifrost – Zero-Effort Kubernetes Log Aggregation
- > Conscan – Scan container images for vulnerabilities, exposed secrets, inefficient storage, SBOM generation, and CIS Benchmark checks.
- > Prometric-Go – A lightweight and configurable Prometheus instrumentation library for Go web applications.

I also work directly with clients on:

- Build AWS Infrastructure using IaC
- Kubernetes scaling & reliability
- DevOps automation & CI/CD
- Infrastructure modernization
- Observability & cost optimization

If you need help tuning your DevOps platform, reducing cost, migrating to Kubernetes, or automating your infrastructure — let's connect.

Open to remote or hybrid opportunities globally — especially in DevOps, Platform Engineering, or Cloud Architecture roles.

Experience

Peek8

Principal DevOps & Platform Engineer

May 2025 - Present (1 year 2 months)

Dhaka, Bangladesh

Building Tools:

- Bifrost – Zero-Effort Kubernetes Log Aggregation
- Conscan – Container Security Scanner
- Prometric-Go – A lightweight and configurable Prometheus instrumentation library for Go web applications

Stibo DX

11 years 8 months

Senior DevOps Engineer

September 2020 - April 2025 (4 years 8 months)

Dhaka, Bangladesh

As a Senior DevOps Engineer, I specialize in bridging the gap between development and operations and professional service team, ensuring seamless collaboration and delivery. With 4+ years of experience in DevOps, I have a proven track record of designing, automating, and optimizing robust CI/CD pipelines, cloud infrastructure, and monitoring solutions for high-performing, scalable systems.

Key Highlights:

- Infrastructure at AWS : Help Operations team to design and architect AWS infrastructure for customers.

- Infrastructure as Code (IaC): Extensive experience with golang to write k8s Operator to provision and manage infrastructure at AWS. Well versed with Terraform and CloudFormation.
- Automation & CI/CD: Proficient in golang to write k8s operator for building and deploying applications. Skilled in tools like bitbucket webhook, argoCD, Tekton Pipeline for automating complex workflows to accelerate delivery.
- Cloud & Hybrid Environments: Proficient in managing cloud platforms like AWS ensuring high availability and cost-effective solutions.
- Containerization & Orchestration: Deep knowledge of Containerization, Kubernetes and Openshift for efficient application deployment and scaling.
- Monitoring & Incident Management: Well versed with monitoring and alerting solutions like Prometheus, Grafana Loki. Also used Dynatrace to monitor/troubleshoot the system.
- Security & Compliance: Ensured security best practices by integrating automated testing, vulnerability scanning, and compliance checks into pipelines.

Software Engineer (Java Backend Developer, Frontend Developer & Scrum Master)

September 2013 - August 2020 (7 years)

Dhaka, Bangladesh

While working as a software Engineer I play the role of a team lead and scrum master.

- Java Backend Development : Worked on developing the backend engine(content store) for world class news CMS named CUE using Java,Restful APIs.
- Video Solution: Developed the video solution for the CMS to intergrate with AWS Transcoder solution.
- Linux System Administration & Automation: Managed and maintainedLinux-based systems for build and deployment using tools like Jenkins.
- Requirement Analysis & Architecture Design:
 - Partnered with stakeholders to gather and analyze requirements,translating business needs into technical solutions.
 - Designed robust, scalable architectures to support complex workflow.
 - Provided technical direction by selecting optimal tools, frameworks,

and design patterns to achieve project goals.

- Web Development:

- Developed dynamic, responsive Front End for CUE CMS using Angular and TypeScript, ensuring seamless user experiences.
- Designed and Integrated backend Restful APIs with the Frontend to deliver full-stack solutions.

- Scrum Master Responsibilities:

- Led Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, ensuring efficient workflows and team alignment.
- Proactively identified and resolved impediments, resulting in improved team velocity and successful sprint deliveries.
- Collaborate with the Product Owner on product planning and project management.

Keywords:

- Server side : J2EE (JSP, Servlet), Restful web service, Server Sent Events (SSE), Real time Update, Python
- Cloud : AWS EC2, S3, , CloudFront
- Media Transcoder : AWS Elastic Transcoder, Brightcove Video Transcoder, Lemonwhale Transcoder Vizrt Vizone
- Web : Javascript (ES6), AngularJS, Typescript, Nodejs

Structured Data Systems Limited

Team Lead

July 2012 - August 2013 (1 year 2 months)

Dhaka, Bangladesh

- Java Backend Development : Developed the backend system for a monetary reward platform named freebeepay with java using Spring 3.1(MVC, JDBC).
- Requirement Analysis & Client Communication: Collaborated with clients to gather requirements, define project scopes, and establish delivery schedules, ensuring alignment with business objectives.
- System Design and Architecture: Designed key system components to meet functional and non-functional requirements. Conducted thorough evaluations of tools and technologies to ensure optimal solutions for project needs.
- Tech Leadership: Provided mentorship to team members, resolving technological challenges and fostering skill development.
- Deployment & Troubleshooting: Managed deployment processes and resolved issues in Unix-based cloud server environments.

- Performance Optimization: Implemented strategies for performance tuning and scaling application servers and MySQL databases to support high availability.
- Team Leadership: Working as a scrum master led the team from the front to achieve the goal and resolve any kind of impediments. Directed and monitored team activities, reviewed deliverables, and ensured the timely achievement of project milestones.

Keywords:

- Spring 3.1 (MVC, JDBC), Log4j, MyBatis, JSP (Java Servlet Pages), Java Script, Apache, Apache Tomcat, MySQL, JSON, Source Control SVN (Subversion), Eclipse.
- Replication, Clustering, Store procedure, performance tuning for MySQL.
- Memcached, Single sign-on (OpenIdap) SMS Notification (Twilio), facebook, twitter authentication.

Aprosoft

Senior Software Engineer

September 2011 - July 2012 (11 months)

Dhaka, Bangladesh

- Oracle Stored Procedure Integration: Implemented and optimized Oracle stored procedures in Java applications using the Spring framework.
- Dev Testing: Developed comprehensive JUnit test cases to ensure code quality and functionality across DAO, Service, and Manager layers. Conducted thorough testing of web services for functionality and compliance using SOAP UI.
- Web Service Development: Designed and exposed robust web services using JAX-WS, Apache CXF, and Spring frameworks.

Keywords :

- Junit, Jax Web service, Apache CXF, Axis 2, XFire, WSDL, Spring 2.5.6, Log4j, Perf4j, Slf4j, Oracle 10g, Oracle Weblogic, TOAD, XML Schemas, SOAP UI,

Together Initiatives Limited

Team Lead

August 2010 - August 2011 (1 year 1 month)

Dhaka, Bangladesh

Worked in project "MHealth" which is a Mobile based Surveying System.

- Java Development : Worked on both backend and mobile application java using Spring 3.1 (MVC, JDBC), Hibernate etc.
- Requirement Analysis & Client Communication: Collaborated with clients to gather requirements, define project scopes, and establish delivery schedules, ensuring alignment with business objectives.
- System Design and Architecture: Designed key system components to meet functional and non-functional requirements. Conducted thorough evaluations of tools and technologies to ensure optimal solutions for project needs.
- Team Leadership: Working as a scrum master led the team from the front to achieve the goal and resolve any kind of impediments. Directed and monitored team activities, reviewed deliverables, and ensured the timely achievement of project milestones.

Keywords :

- Agile Scrum, Struts 2, Jax Web service using spring, Spring 2.5.6, Log4j, Hibernate, JXLS, JSP (Java Servlet Pages), Java Script, Apache Tomcat, Mysql, XML parser, Source Control SVN (Subversion), Eclipse.
- J2me, J2me Polish, KXML, Localization, HTTPS, Database Security (Jasypt).

Spectrum Engineering Consortium Ltd.

Software Engineer

September 2007 - July 2010 (2 years 11 months)

Dhaka, Bangladesh

- Telecom Billing System: Built a comprehensive billing solution tailored for telecom operators, ensuring accuracy and scalability.
- Utility Bill Collection Solution: Engineered a banking solution for efficient utility bill collection.
- Client-Server Applications: Designed and implemented scalable client-server-based mobile and web applications for diverse use cases.
- CMMI Implementation: Led the adoption and integration of CMMI processes and goals within the organization to improve project delivery and process maturity.

Keywords :

- Spring Framework, Adobe Flex, Log4j, Apache ActiveMQ (JMS), Source Control SVN (Subversion), Eclipse.

- CMMI Basics, CMMI Processes Areas, CMMI Generic Goals and Specific Goals, SDLC (Software Development Life cycle)
- Apache MINA, JMX (Java Management Extension), JCS (Java Caching System), Apache JMeter, Shell Script, Network Security, Apache Ant, NetBeans, VISIO, UML.
- Struts 2, Apache Tomcat, Apache HTTP Web Server, AJAX(Asynchronous Java and XML), JSP (Java Servlet Pages), Java Script, ACEGI Security with Spring, Hibernate
- RMI, IReport, Jasper Report, Apache JMeter, Apache Chainsaw, Junit, FTP Server, MySQL, MS SQL, Job Scheduler.

Education

Jahangirnagar University

MS in Computer Science & Engineering · (2005 - 2007)

Jahangirnagar University

B.Sc in Computer Science & Engineering · (2001 - 2005)
